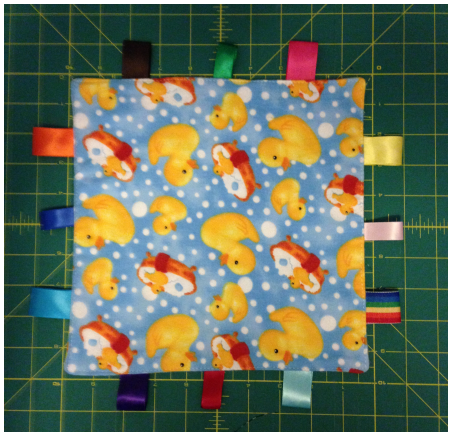
Ribbon-Tag Blanket

Materials needed:

- 2 – 14” squares of soft, snuggly fabric – flannel, fleece, micro-fleece, or other soft material. Use prints for infants to 1 year.
    - You can use different fabrics for front and back of tag blanket
- 16 pieces of satin ribbon (without wire) up to 1” wide pieces, cut to approximately 3½ inch length.
    - Each piece of ribbon should be of a different type or color. Use a variety of colors and textures and arrange them so there are no repetitions on any one side of the blanket.

Instructions:


- Fold each piece of ribbon in half with right-side out (if not double-faced) with ends of ribbon even, pin to hold fold.
- Pin ribbon pieces along the edge of the right side of the back fabric square, having raw edges of ribbon even with edge of fabric.
- Each side of the fabric square should have 3 to 5 pieces of ribbon, fairly evenly spaced with the end pieces at least 2 inches from the corner of the fabric square.
- Baste or sew ribbon pieces to fabric less than ½” from edge.
- Pin front fabric square to back square, right sides together, edges aligned. Leaving a 2” opening for turning and using a ½” seam, sew squares together.
- Clip corners. Turn blanket right side out.
- At opening, turn inside out and pin opening closed.
- Top stitch around tag blanket around edge, turning work at corners.
- Clip threads.
